

Part Number: **TC1279-230**
 Description: **SIDE SLOTTING TOOL,
 FOR 100 x 50 mm DUCT**

Use / Application:

This slotting tool makes a 20mm x 6mm slot in the side/s of 100mm x 50mm duct. This slotting tool is used in conjunction with slotting tool (Part No: TC1279-51) that makes a 42mm x 6mm slot in the base of 100mm x 50mm duct. This process is a simple mechanical means of preparing a shortened length of 100mm x 50mm duct for connection to another standard part. e.g. elbow, cross connector, etc. Mating parts fit together using Joiner (Part No: TC1279-226). A standard mitre box (Part No: TC1279-MITRE) is used on 100mm x 50mm duct, to ensure that a true 90° cut is achieved using a standard panel saw, with maximum 12 TPI.

Benefits & Features:

- Simple mechanical shear type slotting tool (Part No: TC1279-230)
- Mitre box (Part No: TC1279-MITRE); available separately
- Panel saw, 12 TPI; available separately
- Joiner 100mm x 50mm Duct (Part No: TC1279-226); available separately
- Purchase as an individual item

Technical Attributes:

Dimensions	110mm (W) x 115mm (H) x 170mm (D)
Weight	1.33kg.
Materials	Steel
