

Part Number: **TC1279-51KIT**
Description: **MITRE AND SLOTTING TOOL KIT, 220, AND 100 mm DUCT**

Use/Application:

The mitre box and slotting tool kit is a simple mechanical means of preparing a shortened length of 220 or 100 mm duct for connection to another standard part. e.g. elbow, cross connector, etc. The mitre box ensures that a true 90 degree cut is achieved with a standard “carpenter’s” saw on both 220 & 100 mm duct. The slotting tool notches the duct end to suit a standard connector (Part No’s: TC1279-25 & TC1279-27 – Telstra No’s: 035300515 & 035300514). A plastic tool box is provided for storage and transport.

Benefits & Features:

- Simple mechanical shear type slotting tool (Part No: TC1279-51)
- 1/2 inch ratchet driver provided
- “Carpenter’s” saw included
- Plastic tool box included, c/w foam insert
- Purchase as a kit

Technical Attributes:

Dimensions	510mm (W) x 445mm (H) x 245mm (D)
Weight	6.8kg
Material	Steel and Other
