

Part Number: **TC1279-51A**
 Description: **SLOTING TOOL KIT, 300mm,
 220mm AND 100mm DUCT**

Use / Application:

The slotting tool kit is a simple mechanical means of preparing a shortened length of 300mm, 220mm or 100 mm duct for connection to another standard part. e.g. elbow, cross connector, etc.
 The slotting tool cuts a slot in the duct end to suit a standard connector (Part No's. TC1279-25, TC1279-27 & TC1279-320KIT); available separately. The kit is also provided with a plastic tool box, for transport.

Benefits & Features:

- Simple mechanical shear type slotting tool (Part No:TC1279-50)
- ½" ratchet driver provided
- Plastic tool box, for storage & transport, c/w foam insert, included
- Purchase as a kit
